IRS Data Retrieval Tool

- Federal Student Aid (FSA) and the Internal Revenue Service (IRS) collaborated to develop a solution that simplifies FAFSA completion.
- The IRS Data Retrieval Tool (DRT) will allow applicants to request and retrieve their income and tax data directly from the IRS, saving you time while completing the FAFSA.

Student Aid Report (SAR)

- After you complete your FAFSA you will receive the Student Aid Report (SAR) via email or mail. The SAR will include your Expected Family Contribution (EFC) and your estimated eligibility.
- The schools you have included on your FAFSA will receive an electronic version called an ISIR.
- The school will then determine your eligibility and award your financial aid. The school uses the formula of $\text{Cost of Attendance} - \text{EFC} = \text{Financial Need}$. This determines your financial aid eligibility.

Verification

- Verification is a process in which the school must verify the information you provided on the FAFSA. Additional documents may be needed.
- If selected for verification, and the *DRT* was **NOT** used the financial aid office will need a prior-prior year **IRS Tax Return Transcript**.
 - The IRS redacts personal information on the IRS Tax Return Transcripts. If you are submitting these documents, please make sure you have your name and school student ID are on each page.
