K9 Summer Camp

This intensive summer camp will give students the chance to observe many aspects of the criminal justice system in action. Students can look forward to five days of hands on learning with opportunities to participate in outdoor canine training curriculums within our disciplines.

Additionally, students will take part in canine tactical exercises including but not limited to live find, human remains detection, search and rescue etc. used by law enforcement today. The camp will also include demonstrations from our forensics and unmanned aerial systems (drones) units.

You will get the opportunity to see how UAVs (drones) interact with the K9 units to provide an aerial perspective of the mission. Learn how UAVs are being utilized in Public Safety to increase the efficiency and safety of all of those involved in a critical incident. Have you ever wanted to pilot a UAV? This is your chance as you will learn how to execute basic maneuvers similar to what our pilots do and learn all the safety rules and regulations.
